Research team

Please note that the research team must include a biostatistician, or your proposal will be rejected. In the table below, please fill in all fields for each research team member. Please be sure to attach the CV for each research team member when submitting your proposal. Add additional pages, if necessary.

Name	Affiliation	Research roles and responsibilities (Please identify the biostatistician by including the word "biostatistician". Other roles and responsibilities can include research conception and design, data collection, and data analysis or interpretation)	Conflict of interest statement (Please include competing interests such as financial relationships with any Cook companies and/or any competitor companies)	Check if CV is attached

Proposed research

Please attach a research proposal that addresses each of the required components, described below:

- **Background and rationale (required)**
 - Please describe the background for the research. Please provide adequate justification of the scientific rationale, substantiated by evidence that supports the importance and relevance to medical science and patient care. Please provide a reference list for the evidence.
- **Objectives of the research (required)**
 - Please describe the objectives of your research, and why you need the requested data to meet the objectives.
- **Scientific hypothesis (required)**
 - Please clearly define the scientific hypothesis for this research.
- **Statistical analysis plan (required)**
 - Please clearly describe the design of the research, the scope of data needed, including all dependent and independent variables, and statistical methods for data analysis. We encourage you to include mock tables and figures to illustrate the key analyses.
- **Other (optional)**
 - Please provide any supplemental information relevant to your research proposal.

Publication plan

In the table below, please fill in all required fields.

Timeline (required)	
Target publication(s) (required)	
Other (optional)	

The corresponding requestor confirms that the above information about the research team, the proposed research, and the publication plan is accurate and complete at the time of the request.
