**Clinical Research Nurse Specialist**
Cook Research Incorporated is currently accepting applications for a Clinical Research Nurse Specialist to become a part of our growing Medical Affairs team. This function is responsible for providing in-depth medical review of clinical data for global clinical studies.

**Responsibilities**
- Develop and maintain a working knowledge of local and global regulatory requirements and standards that impact clinical studies;
- Perform in-depth and timely medical review of patient-specific clinical study data forms and source documents;
- Assess adverse events identified in the medical review process for potential reportability to regulatory authorities, Data Safety Monitoring Boards, or Clinical events Committees;
- Resolution of data discrepancies or queries;
- Develop, review and maintain medical summaries for study patients;
- Provide medical input for relevant sections of regulatory submissions, clinical research protocols and assist in the development of case report forms; and
- Work closely with project teams regarding the status of clinical studies; support the clinical process as needed to meet study objectives.

**Essential Qualifications**
- Graduate of an accredited school of nursing required;
- Bachelor of Science in Nursing (BSN) degree required;
- Current RN licensure in the State of Indiana required;
- Demonstrated clinical knowledge;
- Experience in a variety of clinical settings preferred;
- Conscientious, dependable, self-motivated individual with outstanding work ethic;
- Strong problem solving skills and personal discipline;
- Excellent written and verbal communication skills;
- Excellent organizational and prioritizing capabilities; and
- Ability to work both independently and within a dynamic team environment.
